MAC NEAL LLC

Accounting · Tax & Withholding Compliance · Regulatory Compliance Support

CAPABILITY STATEMENT

Mac Neal Group LLC dba Mac Neal LLC

COMPANY OVERVIEW

Mac Neal LLC gives finance, accounts-payable and compliance teams hands-on accounting, tax-compliance and regulatory-compliance support, on a project, retainer or overflow basis. We are led by a former **CFTC Division of Clearing & Risk** staff member and **NFA auditor** with 15+ years in financial regulation and derivatives and digital-asset accounting. We provide non-attest services and team with CPA firms where an audit opinion is required.

CORE COMPETENCIES

- **Accounting & close support:** account reconciliations, month- and year-end close, A/P and A/R clean-up, journal-entry support, catch-up bookkeeping, QuickBooks Online setup and cleanup
- **Vendor & withholding compliance:** W-8/W-9 programs, Forms 1099, 1042/1042-S and 5472, nonresident-payee reviews, foreign-payment remediation across multiple years
- **Tax preparation & resolution:** individual and business returns, SPV & investment partnership returns (Form 1065, investor K-1s), business tax catch-up, IRS & state tax resolution
- **Audit readiness & internal controls:** control testing and documentation, PBC preparation, corrective-action plans, audit-liaison support
- **Outsourced controller support:** budgeting, cash-flow forecasting, performance reporting, financial controls and process documentation
- **Payroll & entity compliance:** payroll setup and filings, onboarding packets, entity registrations, compliance calendars
- **Regulatory compliance for financial firms:** CFTC/NFA registration readiness, regulatory financial operations, recordkeeping and internal controls, examination preparation
- **Training & automation:** financial-controls training; finance workflow mapping and automation planning

DIFFERENTIATORS

- Proven on backlogs: for a foreign-owned consulting firm, rebuilt six years (2019–2025) of U.S. withholding records and documented every treaty position, turning a potential exposure of more than $1.5 million in tax, penalties and interest into a $49,000 refund claim
- Regulator's-eye view: CFTC clearing-house oversight, NFA audit experience, Wall Street regulatory accounting (Mizuho Securities USA)
- Fixed-price starter engagements under typical no-bid thresholds
- We teach as we go: consistent, plain-language communication that leaves the client team stronger; two-person review on every deliverable

WHO WE SERVE

Finance, AP, tax and compliance teams at mid-size and large companies; professional-services, healthcare, real estate and financial-services firms. Supplier portals: SAP Ariba (SCE), Sodexo.

SELECTED COMMERCIAL EXPERIENCE

- **Veteran-owned digital agency (Hiero Digital, hireahiero.com)** — entity formation, bookkeeping, compliance setup, and annual accounting and tax since startup — operating business; available as a reference
- **Real estate management company** — built an accounting system — replaced spreadsheet-only tracking with structured books
- **Commercial printing company** — accounting, bookkeeping and AI automation — payroll setup and worker/vendor packets prepared
